

# **Voter Guide 2014: Corporate Taxes**

National Priorities Project examines issues related to the federal budget in time for the 2014 election.

#### **Corporate Taxes**

Money that comes into the U.S. Treasury from tax revenues funds critical programs such as education, clean drinking water, public transportation, and law enforcement.

American corporations have long paid a lower federal income tax rate than individuals, due to a variety of loopholes and deductions available in our tax code.

The size of tax breaks going to corporations has grown significantly over the past 40 years. As a result, corporate taxes as a percent of federal revenue have declined from about 44 percent in 1944 to about 13 percent in 2014.<sup>1</sup> Meanwhile, income taxes paid by regular Americans will account for about 46 percent of all federal revenue in 2015.<sup>2</sup>

# **Corporate Tax Breaks**

- Corporate loopholes, credits, and deductions in the tax code together totaled nearly \$176 billion in fiscal year 2013. In other words, the U.S. could have had \$176 billion more to spend on education, health care, or other priorities if we did not have all those opportunities for corporations to exploit the tax code. <sup>3</sup>
- Accounting for inflation, the size of corporate tax breaks has more than doubled over the last two decades (in 1993, the cost of corporate tax breaks totaled just \$75 billion).
- Over the past 10 years, corporate tax breaks alone have siphoned off more than \$1.3 trillion dollars from federal tax revenue – which could have funded our entire food and agriculture budget (things like food and nutrition assistance and agriculture research) over the same time period, with billions to spare. 4

## What is Corporate Inversion?

- *Inversion* refers to the practice of a company moving its business address overseas by purchasing and merging with a foreign company, while maintaining its operations and consumer base in the U.S., with the intention of avoiding U.S. taxes.
- Since 1983, 76 corporations have moved their addresses overseas to avoid U.S. taxes, including well-known brands such as Fruit of the Loom and Sara Lee, and many more are seeking to employ the tactic.<sup>5</sup>

### **Public Opinion**

Polling shows that 66 percent of Americans think that corporations don't pay enough in taxes, 6 and 79 percent want to close tax loopholes to ensure corporations pay as much on foreign profits as they do on domestic profits. Two-thirds of Americans say they disapprove of corporate tax inversions. 8

#### What Americans Say

"We haven't had any teachers' salary increases because we were told that... there's no money and yet, at the same time, these [private] companies are getting all kinds of... tax subsidies."

-Conrad (Austin, TX)

#### What to Ask Your Congressional Candidate

- Do you support changes to the tax code to raise additional tax revenue and if so, what changes do you support?
- If you support reducing the number of corporate loopholes in our existing tax code, which specific loopholes and deductions would you eliminate?
